Dear Sir:

In Life's July 27, 1959 issue "Bold Proposal For Peace, a New Kind of Great white fleet, Planned. Count me as a supporter of "The New White Fleet" if it is not a communist front for their Peace movement or another Socialize medicine crusade. The Marshall Plan was a blessing for many and so would be the New white fleet, but would it eventually bankrupt us to fulfill it in its entire goals. Our bankruptcy is a communist goal.

On page 19 "a floating technical school to help improve the local standard of living" also "Later on, a seventh ship could be added with an exhibit of U.S. Culture and industry". Preventive medicine schools and medical technical schools would work wonders. The exhibit ship of U.S. Culture and industry should not be brought in too soon. After we have proven we are their friend, seen their needs, learned their problems and are wanted by them to help them help themselves toward building a standard of living in every phase of life that only God fearing and free individuals could learn to know.

Yours Truly
W. D. Yarbrough Jr.
